

DPA Summer Metaverse

This school year, DPA will be running a Summer program to expose students to real world software development patterns, practices, management and teamwork.

🌟 *You can do anything* 🎯 *If you put your mind to it* 📢 *so let's work hard* 😎

How will it work ?

Students will work together collaboratively in teams to make full stack web applications.

I have not failed. I've just found 10,000 ways that won't work.

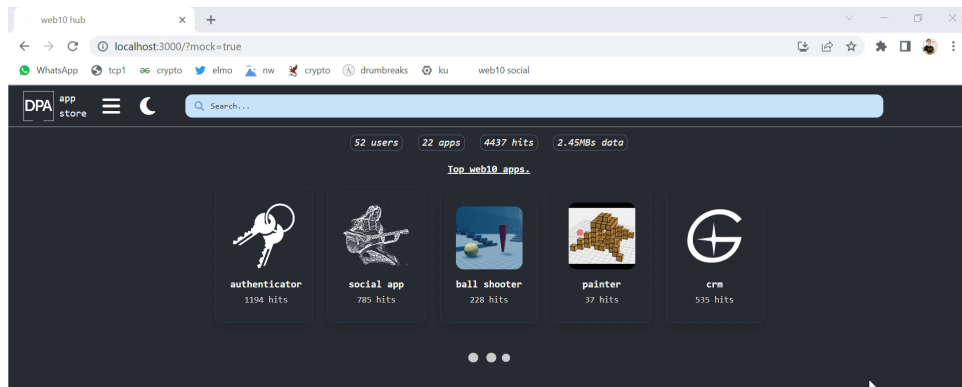

[- Quote By Thomas Edison](#)

Details

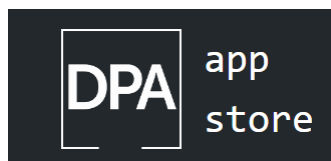

The summer program will be run as a fun friendly contest. At the end of the summer, a winning team will win Summer Metaverse fanny packs. To participate in the contest, there will be three teams to choose from.

Team Options :

- Real Time Player Versus Player 3D Game Team (Ball Shooter) 🎮🏆👤
- 3D Creative Sculpting Game [Voxel Painter] 🎨🎁👤
- High Speed Decentralized Social Media App < web10 Social > 📍💬💬

The applications that each team will make will be published to the brand new Digital Pioneers Academy App Store.

At the end of the summer, the students will present their apps, and a panel of faculty judges will vote on one of the three applications. One team will be declared the winner.

Scoring

The apps will be graded from 1 to 10 on the following criteria :

functionality - How impressive is the functionality that each team added to their respective apps?

product design - How impressive are the visual design improvements that each team made?

management - How good was the team work? was there effective delegation of tasks, planning, and execution?

presentation - How good was team's slide deck / oral presentation of their app?

Prize

Members of the winning team will get DPA Summer Metaverse Champion fanny packs.
